

Engineering Intern or Working Student (m/f/d)

Remote / Hybrid

Join us on our mission to digitalize and transform the shipbuilding industry! We are looking for an **Engineering Intern or Working Student** who will support us on our way to develop a next-generation cloud software for ship design and planning.

Your Role

- Work closely with our project teams to create demos which are showcased to industry professionals
- Participate in strategic discussions regarding the product development
- Test the product and report problems to the development team
- You will play a key role in driving the product vision forward as you will be working on the interface between shipbuilding and product development

Your Skills

- You are currently studying shipbuilding, mechanical engineering or related subjects at a European University
- You are familiar with basic CAD tools and have some basic programming skills
- High willingness to learn, perseverance and motivation to work on complex topics and good communication skills
- Strong affinity for ships and interest for the topic "Maritime/Shipyard 4.0"
- Proficient in German and English
- Note: EU working rights are required

Our promise

- You will be part of a unique early-stage startup and have the opportunity to take on responsibility early on
- You will work actively and sustainably on the vision of a digitalized shipbuilding industry
- An inspiring work environment with a great team where you will grow and develop a comprehensive set of skills
- Flexible working hours and remote working possibilities
- With good performance, you will have the chance to get an offer for a full-time position after graduation

Sounds exciting? We are looking forward to hearing from you! Send us your CV and join us on our mission to disrupt the shipbuilding industry:
