

IF THERE IS WATER, THERE IS A WAY.

SAL Engineering, a member of the Harren Group, is an independent engineering house, originated from one of the world's leading technical project carriers – SAL Heavy Lift. SAL Engineering provides comprehensive marine engineering services. We do not only develop concepts – we implement our solutions. We have a track record of thousands of successful projects behind us. For over 40 years we have been developing marine heavy lift and installation solutions. **To strengthen our team at the SAL headquarters in Hamburg, we are looking for a:**

STUDENT ASSISTANT

BACHELOR STUDENT / MASTER STUDENT

(m/f/d)

Your main responsibilities:

- Planning of cargo operations, supporting the daily business (stowage plans, FEM calculations, stability calculations, shipping manuals etc.)
- Design and calculation of cargo securing, lifting tools etc.
- Developing and testing AutoCAD drawing templates for the daily business
- Analysis of past sea voyages for fleet optimization
- Development of various calculation templates
- Further tasks based on the students interests and competences will be agreed individually

Your profile and qualifications:

- Student of Naval Architecture, Mechanical or Structural Engineering or similar
- Computer skills especially AutoCAD and MS Office
- Knowledge of Visual Basic (VBA) and/or Python programming languages would be beneficial
- Fluency in verbal and written English
- Team and communication skills are essential
- Creative and solution-oriented way of thinking and working

We offer you an interesting and responsible position in an innovative and international company with a highly motivated, dynamic and informal working environment. Support for a thesis (bachelor, project or master) is gladly provided in case of common interest in the topic. The weekly volume of work should be preferably 2 days or at least 10 hours.

Please send us your CV and a brief introduction of yourself to the below mentioned e-mail address.

Please send your application documents to:
